The future of protoplanetary disk models

Brown dwarfs, mid-infrared molecular spectra, and dust evolution

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 15 oktober om 12:45 uur

door

Aaron James Greenwood

geboren op 21 februari 1991
 te Napier, Nieuw-Zeeland

Promotores

Prof. I.E.E. Kamp

Prof. L.B.F.M. Waters

Beoordelingscommissie

Prof. F.F.S. van der Tak

Prof. C. Dominik

Prof. C. Helling

ISBN: 978-94-034-0820-0 (printed version)

ISBN: 978-94-034-0819-4 (electronic version)

Cover: the MAGIC telescopes, Roque de los Muchachos Observatory, La Palma
Inside back cover: New Zealand Tui “Tuition” by Joshua Drummond @tworuru
Printed by GVO Drukkers & Vormgevers on recycled paper

CONTENTS

1	INTRODUCTION	1
1.1	Goals of the thesis	2
1.2	Disk formation	3
1.3	Disk classification	4
1.4	Disk observations	6
1.5	Brown dwarfs and their disks	9
1.6	Planets and brown dwarfs	13
1.7	Dust structure, grain growth, and migration	15
1.8	Modelling approaches	17
1.9	Molecular spectroscopy	18
1.10	Infrared spectra	20
1.11	Disk models	20
1.11.1	ProDiMo	21
1.11.2	FLiTs	23
1.11.3	Model results	24
1.12	This thesis	24
2	THERMOCHEMICAL MODELLING OF BROWN DWARF DISKS	29
2.1	Introduction	30
2.2	Models	32
2.2.1	Defining the fiducial model	33
2.2.2	^{12}CO sub-mm lines from the fiducial model	34
2.2.3	The fiducial model and grid selection	38
2.2.4	Chemical modelling and comparisons with T Tauri disks	40
2.3	Results and discussion	43
2.3.1	Line ratios and flux predictions of brown dwarf disks	44
2.3.2	Disk geometry	46
2.3.3	HCN chemistry	47
2.3.4	HCO^+ chemistry	49
2.4	Conclusions	53
2.5	Acknowledgements	54

3	THE INFRARED LINE-EMITTING REGIONS OF T TAURI DISKS	55
3.1	Introduction	56
3.2	FLiTs	58
3.2.1	Computational requirements	59
3.2.2	Data processing	62
3.3	Disk models: a standard T Tauri model	63
3.3.1	Line-emitting regions	63
3.4	Permutations to the standard model	67
3.4.1	Changes in the line-emitting area	70
	Sensitivity to gas and dust temperatures	71
3.4.2	Spectra from the model series	78
3.4.3	Absorption lines	80
3.4.4	Dust settling	81
3.5	Conclusions	86
3.6	Acknowledgements	87
3.7	Supplementary data	87
4	THE EFFECTS OF DUST EVOLUTION ON DISKS IN THE MID-IR	107
4.1	Introduction	108
4.2	Dust growth and migration	110
4.3	Modelling strategy	111
4.3.1	Model parameters	112
4.4	Dust migration and disk surface densities	113
4.5	Size of the dust disk	115
4.6	Mid-infrared spectra	121
4.6.1	Line fluxes: C ₂ H ₂ in comparison to other species	125
4.6.2	Properties of the line-emitting regions	125
4.7	Discussion	132
4.8	Conclusion	133
4.9	Acknowledgements	134
5	CONCLUSIONS AND OUTLOOK	135
A	ENGLISH SUMMARY	141
B	NEDERLANDSE SAMENVATTING	155
	ACKNOWLEDGEMENTS	169
	BIBLIOGRAPHY	171
